

Revised specification for BTEC Nationals in Applied Science (BN018348)

Issue 2 (March 2008)

This specification has been amended on page 323, in Unit 27: Chemical Periodicity and its Applications.

The change is to the unit content of learning outcome 3. The content now reads '*reactions of chlorides of period 3 elements with water*' rather than the original content ('*reactions of chlorides of period 2 with water*') which was incorrect.

Please ensure that you use this revised content when you teach this unit.
