

Referee's Assistant – Rugby League 2007-08 (DVD-ROM)

This is the world-leading, comprehensive interactive guide to all the laws of Rugby League, developed with and fully endorsed by the Rugby Football League (RFL) with hundreds of clips of match footage, featuring Super League teams.

With expert commentary provided by Sky Sports Eddie Hemmings, explaining each law in detail, and class-leading 3D animations giving a 'referee's-eye view' of various scenarios and set pieces, this network software engages learners in the classroom like no other. The software also features hundreds of interactive questions to test learners' knowledge, arranged as 'Test yourself' sections at the end of each law module, together with a mock exam, to prepare candidates for the new 'BTEC Laws of Sport - Rugby League' examination and the Rugby Football League's entry-level refereeing qualification.

The Referee's Assistant has been specifically designed to support GCSE and A Level PE, BTEC National and First awards in sport, the new Edexcel level 2 BTEC in the 'Laws of Sport - Rugby League' and the RFL's refereeing qualifications.

The annual product license is for an unlimited number of users across an unlimited number of your institution's sites and runs until 1st September 2008 (the software is updated annually to keep pace with law changes).
